HEALTHY & SUSTAINABLE LIFESTYLE (LEVEL 3)

Description
Learners will be introduced to recommendations on how to maintain physical and mental health, and then will be asked to implement those and monitor along the way.

Leading Question
Is my family leading a healthy and sustainable lifestyle?

Total Time Required
~7 hours over 8 days

Supplies Required
Paper and pencil.

Learning Outcomes
1. Data collection and representation in tables and graphs
2. Understanding and calculating the average
3. Learning about recommendations to maintain physical and mental health, and practicing those

Previous Learning
Addition and simple division.

DAY 1
Today you will learn about how to keep a healthy body and mind!

Suggested Duration Activity and Description
10 minutes
- Introduction: this project, we will look at how we can keep a good health for our body and mind.
- Body health requires eating well, exercising, and sleeping well.
- To take care of our mind, we need to be optimistic, grateful, and talk to people we trust to calm down if we are afraid or worried about something.
- Suggested mental health activities:
  - Express feelings, to those you trust, without hurting others.
  - Try to be optimistic during hard times by focusing on the big picture and on positive aspects, as lessons learned.
  - Regularly recall what you are grateful for.
  - Always check on and review your purpose and goal in life:
    - What do I want to do when I grow up?
    - How will that help other people, or our planet?
15 minutes

- Sleeping habits:
  - Hours of sleep (recommended 9 to 11 hours for this age)
  - How many hours have you slept last night? Is the duration within the recommended range?
  - On a piece of paper, draw a weekly log as shown below and hang it on the wall in your bedroom to note down the data on it everyday.

<table>
<thead>
<tr>
<th>Day</th>
<th>time I went to bed</th>
<th>time I woke up</th>
<th>Sleep duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monday</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Tuesday</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Wednesday</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Thursday</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Friday</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Saturday</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Sunday</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*Once you have the data filled for 1 whole week, you will discuss the following questions:

\[
\text{Average} = \frac{\text{Sum of sleep duration for 7 days}}{7}
\]

Average is a ratio that summarizes a multiple of answers in one somehow general answer.

20 minutes

- Eating habits
● Compare the type of food you ate yesterday to the proportions shown in the plate*:
  - ¼ Grains (bread, rice, pasta, ...)
  - ¼ Protein (beans, fish, eggs, meat)
  - A little more than ¼ Vegetables
  - A little less than a ¼ fruits
  - Use healthy oils with the food

*It is worth mentioning that traditional ways of eating are the ideal guide to good food and good health. The above is just a modern universal suggestion of a healthy diet. See examples of Traditional Diets adapted from https://oldwayspt.org/

● To discuss with the family:
  - To what extent was your food intake as balanced as in the above diagram?

● Drinking water
  - 7 glasses (1.5 liters) for 9 to 12 year olds
  - 8 to 10 glasses (2 liters) for 13+ years
  - Do you usually drink as much as recommended daily?

● Draw a table like the one below to monitor your daily eating habits.
  - In the first column, answer with a Yes or No.
  - In the second column, draw a glass of water every time you drink one.

<table>
<thead>
<tr>
<th>Day</th>
<th>Was my food intake balanced</th>
<th>Glasses of water I drank</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Then calculate the mean, median, range and mode of the number of water glasses you drink per day.

The range = Highest – Lowest

Mode: is the most frequent number.

- *At the end of the week, learners will present the compiled results to the family and discuss the below questions:
  - What was the total number of Yes, versus No answers?
  - Did you drink enough water every day?
  - What do you need to do to improve your eating and drinking water habits to make them more health nourishing?
  - Should you change the time of your meals, cooking patterns, or ingredients?

20 minutes

- Physical workout
- From the World Health Organization (WHO):
  1. Children and youth aged 5–17 should accumulate at least 60 minutes of moderate- to vigorous-intensity physical activity daily.
  2. Amounts of physical activity greater than 60 minutes provide additional health benefits.
  3. Most of the daily physical activity should be aerobic. Vigorous-intensity activities should be incorporated, including those that strengthen muscle and bone, at least 3 times per week.

- Source: WHO [Global Recommendations on Physical Activity for Health](https://www.who.int/water_sanitation_health/guidelines-recommendations/physical-activity)

[https://forms.gle/LGAP9k17fMyJrKJN7](https://forms.gle/LGAP9k17fMyJrKJN7)
• As mentioned above, you are required to do physical activity daily, and to show your daily exercise time on a bar graph like the one below:
• Aerobic activity examples that can be done indoors.
EAA welcomes feedback on its projects in order to improve, please use this link:
https://forms.gle/LGAP9k17fMyJrKJN7
EAA welcomes feedback on its projects in order to improve, please use this link:
https://forms.gle/LGAP9k17fMyJrKJN7

- You are required to workout daily at home, or outside keeping a far distance from others, and to note down the time of your daily workout minutes in a table like the one below, in order for it to be shown on a graph like the one below:

<table>
<thead>
<tr>
<th>Day</th>
<th>Workout minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monday</td>
<td>60</td>
</tr>
<tr>
<td>Tuesday</td>
<td>45</td>
</tr>
<tr>
<td>Wednesday</td>
<td>75</td>
</tr>
<tr>
<td>Thursday</td>
<td>60</td>
</tr>
<tr>
<td>Friday</td>
<td>45</td>
</tr>
<tr>
<td>Saturday</td>
<td>60</td>
</tr>
<tr>
<td>Sunday</td>
<td>75</td>
</tr>
</tbody>
</table>
DAY 2

Today you will learn about physical exercise you can do at home.

<table>
<thead>
<tr>
<th>Suggested Duration</th>
<th>Activity and Description</th>
</tr>
</thead>
</table>
| 15 minutes          | ● Let’s start today with a mental health check  
                      - Recall at least 3 things that you are grateful for. Express each in one or more words. You may also draw a representation of it.  
                      - Being Grateful means being highly appreciative and showing kindness. |
| 45 minutes          | ● Observe 3 family members and note down how many times they touch their face in 15 minutes. You must tell them and get their consent that you will be observing them for an experiment that is beneficial for them. Then wait for some time before you start the 15-minute observation time to ensure that they do it naturally as usual.  
                      - Observe one family member at a time. Note down the times they touch their face using a tally chart and write it in the below table.  
                      ● When collecting the information, for every touch of the face, a line would be drawn in the correct box. When you get to five lines, the fifth line needs to be crossed through the first four. (This makes counting the lines at the end easier!). See below how after reaching 4 counts, the fifth is concluded with a crossed line. See the examples below for a 4 followed by a 5. |
Family member | No. of times they touch their face in 15 minutes | Estimate for 1 hour

- In the above table, you must multiply by 4 the Number you counted in 15 minutes, and the answer will be the estimate for 1 hour.

**15 minutes**
- Show the results to family members. Ask them if they expected this? Now knowing the estimate of how much they touch their face in an hour, what will they do the next time they go out? They must be careful not to touch their face when their hands are not washed in order to eliminate the chances of catching the Covid19 infection.

**All day long**
- Remember to:
  - Record data on the daily eating habits table
  - Fill in the Sleeping log
  - Conduct your daily workout and note down the time in the table
- Did you record the data from yesterday? Have you faced any difficulties doing that?

**DAY 3**

Today you will continue your healthy and sustainable lifestyle with a mental health check.

<table>
<thead>
<tr>
<th>Suggested Duration</th>
<th>Activity and Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>15 minutes</td>
<td>Mental health check</td>
</tr>
<tr>
<td></td>
<td>- We must always check on and review our purpose and goal in life:</td>
</tr>
<tr>
<td></td>
<td>- What do you want to be when you grow up?</td>
</tr>
<tr>
<td></td>
<td>- How will that help other people, or our planet?</td>
</tr>
</tbody>
</table>
| 30 minutes          | Solve the Data handling Worksheet **without using a calculator**, then share your work and answers with your parent.

EAA welcomes feedback on its projects in order to improve, please use this link: [https://forms.gle/LGAP9k17fMyJrKJN7](https://forms.gle/LGAP9k17fMyJrKJN7)
- Criteria: logically following the formulas and reaching correct answers.

10 minutes
- Present your work and answers to parents.

Answer Key
1. c 8.86 or $8\frac{6}{7}^\circ$C
2. a 1  
   b 4
3. 13.7 seconds
4. a 50.89 or 50 $\frac{8}{9}$ matches  
   b. 49  
   c. 5  
   d. 52

All day long
- Reminder to:  
  - record data on the daily eating habits table  
  - Fill in the Sleeping log  
  - Conduct your daily workout and note down the time in the table

---

**DAY 4**

Today you will continue your healthy and sustainable lifestyle with a mental health check, physical exercise and monitoring your eating habits.

<table>
<thead>
<tr>
<th>Suggested Duration</th>
<th>Activity and Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>20 minutes</td>
<td>Mental health check</td>
</tr>
</tbody>
</table>
|                    | - Do you sometimes have strong feelings that you like to tell someone about? Feelings like fears, worries, sadness, pride…?
|                    | - To whom do you usually express your feelings?  
|                    | - Is there anything you want to talk about today? |
| 60-70 minutes      | Learners do a 1-hour workout at home  
|                    | Learners monitor daily eating habits and record scores in the respective table  
|                    | Learners write their sleeping hours in the sleeping log |

---

**DAY 5-7**

Today you will continue your healthy and sustainable lifestyle with a mental health check,

EAA welcomes feedback on its projects in order to improve, please use this link:  
https://forms.gle/LGAP9k17fMyJrKJN7
physical exercise and monitoring your eating habits.

<table>
<thead>
<tr>
<th>Suggested Duration</th>
<th>Activity and Description</th>
</tr>
</thead>
</table>
| 60-70 minutes       | ● Learners do a 1-hour workout at home  
                     ● Learners monitor daily eating habits and record scores in the respective table  
                     ● Learners write their sleeping hours in the sleeping log |

**DAY 8**

Today you will show your parents what you’ve learned in the last week.

<table>
<thead>
<tr>
<th>Suggested Duration</th>
<th>Activity and Description</th>
</tr>
</thead>
</table>
| 15 minutes          | ● Present to the family the **sleeping log** and the average sleeping hours that was calculated.  
                     - Are Is the average duration within the recommended range? If not, what can be done do to get your sleep within the recommended range? |
| 15 minutes          | ● Present to the family the **Eating habits table**, followed by a discussion.  
                     - What was the total number of Yes answers?  
                     - What was the total number of No answers?  
                     - How can we improve our eating and drinking water habits to make them more health nourishing?  
                     - Should we change the time of our meals, cooking patterns, or ingredients? |
| 15 minutes          | ● Present your **workout table** along with the graph showing the daily work out duration  
                     ● Calculate the average of your daily workout. Is the average close to 60 minutes? What can be done for you to complete 60 or more minutes of daily workout? |
| 15 minutes          | ● Reflection:  
                     - What did you appreciate the most about this project?  
                     - Do you think you can lead a lifestyle that helps you maintain mental and physical health?  
                     - How can you help or teach someone else to maintain a healthy lifestyle? |
ASSESSMENT CRITERIA

- Tables and graphs are duly filled
- The graphs are accurate, and calculations are correct.
- Learners show motivation and grit while working on activities
- Learners show ownership and enthusiasm when presenting their results at the end.

ADDITIONAL ENRICHMENT ACTIVITIES

- Create a journal of daily practices to be shared with friends.
- Lead daily workout sessions for the family
- Write down a suggested meal schedule for a week following the Healthy Plate model rations.

MODIFICATIONS TO SIMPLIFY

The project can be reduced to the Healthy Eating plate, sleeping log and daily workout graph.
1. Here is a chart of the maximum temperature each day for a week in a Mediterranean city in January.

   a. The temperature on Saturday was 7°C. Draw in the bar for Saturday.

   b. Make a table showing the same information as on the bar chart.

   c. Calculate the Mean temperature for the week.

2. An article from the Gulf Times has 50 words in it. Here is a bar chart of the number of letters in each word.

   a. What is the range of the number of letters in the words used?
b. What is the mode (most common number) of letters used in a word?

3. Bashir runs 100 metres ten times. These are his times in seconds.

<table>
<thead>
<tr>
<th>Time (seconds)</th>
<th>13.4</th>
<th>13.0</th>
<th>13.9</th>
<th>13.7</th>
<th>13.3</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>13.5</td>
<td>14.0</td>
<td>14.4</td>
<td>13.8</td>
<td>14.0</td>
</tr>
</tbody>
</table>

What is his mean time?

4. Alia counts the matches in nine matchboxes. Here are her results for the nine boxes:

<table>
<thead>
<tr>
<th>Number of matches in a box</th>
<th>48</th>
<th>49</th>
<th>50</th>
<th>51</th>
<th>52</th>
<th>53</th>
<th>54</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
</tr>
<tr>
<td></td>
<td>✓</td>
<td>✓</td>
<td></td>
<td>✓</td>
<td></td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>✓</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

a. What is the median number of matches in a box?
b. What is the mode for the number of matches in a box?

c. What is the range of the number of matches in a box?

d. Alia counts the matches in one more box. She works out that the mean number of matches in all ten boxes is 51. Calculate how many matches are in the tenth box.
TRADITIONAL DIETS

African Heritage Diet Pyramid
